Goldsworthy, Warwick is one of thousands of patent owners that we feature on IP in Australia which contains details of the over 1 million patents registered in Australia. We provide this information to help Australians with their research in the intellectual property space but to also help inventors (first time or experienced) gain knowledge and make informed decisions about filing patents. Without data and insights into the industry it's very difficult making informed decisions on the right patent attorney to use which is why beyond information we provide a service to assist individuals select the right patent attorney for them based on in-depth analytics we have compiled not just on firms but specific attorneys as it's ultimately an individual who is going to be helping you and hence it's individuals not firms you should be assessing. The costs associated with undertaking a patent can be significant and the process can span years so it's extremely important to get the right partner.
